## Abstract

A concise non-structured abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. Abstract must be able to stand alone. References should be avoided. Non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself. Five key words should be listed after the abstract. Keywords should be self-sufficient to allow the classification of the paper by subject area and to function as heads in a volume's index of keywords. Choose them according to Index Medicus, do not merely duplicate words from the title.

**Keywords:** Keyword 1, keyword 2, keyword 3, keyword 4, keyword 5
